

# TRACE3

## TRACE3 AWARDED AZURE ADVANCED SPECIALIZATION IN APPLICATION MODERNIZATION (WEB APPS)

**Irvine, Calif. – July 9, 2021** – Trace3 proudly announces its [Cloud Solutions Group](#) achieved Modernization of Web Applications to Microsoft Azure Advanced Specialization – a testament to Trace3’s pursuit of value delivery in the enterprise space around enabling the true advantages of cloud platform adoption.

This endorsement from Microsoft signals an appreciation and acknowledgement of deep domain knowledge, clear prior success, and extensive experience in architecting and modernizing web application workloads.

“The Advanced Specialization in Application Modernization on Azure validates that our Cloud AppMod practice area continues to grow and thrive,” Cloud Solutions Managing Director Chris Nicholas said.

Microsoft and Trace3 partnered to focus on a methodology that incorporates the Well-Architected Framework (WAF), and when applicable, the transplant into Enterprise-Scale Landing Zone Architecture. Trace3’s history displays a habit of addressing enterprise crown jewel workloads with its repeatable and extensible app modernization methodology.

“We could not be prouder of the team,” Nicholas said. “Together, we have led engagements on over 50 crown jewel applications in the Fortune 500 space and are very proud to add this accolade to our Gold Competencies in Application Development, Application Integration and Cloud Platform.”

As a function of earning the Advanced Specialization, partners need to present Application Modernization capabilities, showcase customer testimonies and clearly articulate examples of end-to-end success, taking workloads from design and architecture all the way through to production runtime. Trace3 successfully completed the 3<sup>rd</sup>-party audit in partnership with Microsoft and is recognized as a strong performer in this category. The audit included reviews of Trace3’s positions and experience managing App Service, Container and Azure Kubernetes Service application profiles.

**CONGRATS**  **TRACE3**  
CLOUD SOLUTIONS GROUP

**About Trace3** Trace3 is a premier provider of consultation services and advanced technical solutions. Founded in 2002, Trace3 empowers organizations to embrace the ever-changing IT landscape through elite engineering and dynamic innovation. With deep roots in the data center, Trace3 offers a broad mix of end-to-end technology services and solutions. These range from artificial intelligence and data insights to cloud computing and security consulting. Trace3 also maintains a Venture Capital (VC) CXO Briefing program, with a sharp focus on emerging technologies, and provides clients with extensive research focused on the latest IT trends.
