

Trace3 Expands Leading Security Practice with the Addition of Mike Morrato, Security Architecture and Engineering Director

Irvine, Calif. (Nov. 20, 2020) – Trace3, a premier technology solutions provider for enterprise and commercial clients, continues to attract top talent to their esteemed security team with new Security Architecture and Engineering Practice Director, Mike Morrato. As a seasoned expert, Mike has spent much of his 28 years in the IT industry sharply focused on cybersecurity both as an individual contributor and executive leader at Cisco, Visa, and Worldpay.

Immediately becoming a key resource to the team, Morrato has taken a leading role in expanding Trace3's Zero Trust offerings where he will be working with the company's top-engineers to build upon the foundational components of the current framework as it relates to architecture.

"Seeing Trace3's focus on Zero Trust and given my experience and passion for both simplifying and enhancing enterprise security practices, I knew this would be a good fit," said Morrato. "I look forward to disposing the common myths around Zero Trust, and helping clients further understand the journey and benefits around a comprehensive architectural approach to cyber security."

As the leading Zero Trust partner to some of the biggest names in the industry, Trace3 has over 170 Zero Trust experts focused on helping businesses mature their current security programs through a Zero Trust journey.

"We want our clients to know they are working with one of the best teams out there to keep their business protected as threats become more advanced," said Bryan Kissinger, PhD., CISO, and Head of Trace3 Security. "With Mike's expertise in the cyber arena and renowned consulting background, I am confident saying this team is unlike any I've had the pleasure of leading."

In his most recent role, Mike was a leader within Visa and Worldpay's security architecture and engineering organizations where he co-developed the cyber security architecture to protect the fintech giants from ever-evolving threats. He has previously sat on the Cloud Advisory Board for Palo Alto Networks, and spent some time at Gartner, leading and delivering research. As a seasoned public speaker on cloud and cybersecurity and cyber security, Mike has also spoken at a handful of major industry events like Gartner's Catalyst and Symposium conferences, AWS re:Invent, and Cisco Live.
